To the FCC,  
I subscribe to XM radio. XM provides me with clear reception, almost unlimited variety, and almost no commercials. XM is filling a niche where broadcast radio has failed miserably.  
I also subscribe to free enterprise and I am enraged that the National Association of Broadcasters is trying to dictate what I listen to! If they are worried about their market share all they have to do is improve their product!!  
I strongly urge you to reject the NAB's petition 04-160.  
Don't let them strong arm you! Do you really want to buckle under the pressure of a spoiled association that resorts to blackmail to get what they want?  
Please let calm heads prevail...don't let them dictate what I listen to!  
Respectfully, Steve Moses
